Steve Pajela

Technical Consultant / Programmer, **Software Division**

Qualifications

ITIL Foundation Certificate in IT Service Management

Bachelor of Science in Computer

Engineering Database Administrator

System Analyst

Software Engineer

Background

Steve's expertise spans over 18+ years in the software and product management industry.

With IT experience from analysis, implementation and development of database application software, Steve understands what is required to successfully project manage complex strategies to meet technical standards and roll out.

An integral part of our team, Steve is able to work with us to develop systems, processes, documentation and facilitate implementation to our clients in a timely, and professional manner.

Steve has extensive knowledge of Ostendo's database structure enabling the team to create system automation scripts and complete module coding. With knowledge of Ostendo and scripting languages Steve also has the ability to create custom triggers, stored procedures and tables. He is also capable of facilitating the flow of information between Ostendo and other systems or create custom reporting formats.

Steve has background exposure to a range of industries including: Logistics, health and wellbeing, banking and financial accounting and insurance.
