

Freeway Features

Work Online & Offline efficiently

Ostendo Freeway users can keep working even when there is no network connectivity. The app is self-contained and with its own database.

Relevant to all industries

Solutions can be developed for a huge range of requirements.

Flexibility

Record data, browse Guides / Catalogues, fulfil compliance requirements, inquire on information etc.

Ease of Solution development

Template-driven. No programming experience required!

Standardised Processes

Checklists and pre-defined datasheet templates guide users to perform work according to set standards and processes.

Unlimited users

No limit to how many devices can install the Ostendo Freeway app.

Checklists

Simple or Rules-based checklists; optional or mandatory entries. The objective is to guide the end-user in a logical step by step sequence to capture data and/or fulfil compliance requirements.

Pictorial Guides

DIY Instructions, business procedures, user guides, etc. can be easily produced and published.

Product Catalogues

Easily publish catalogues with product images organised into your desired hierarchical structure.

Time and Material recording

Labour hours and materials usage can be easily captured. There is also the ability to predefine lists and set auto start & stop rules.

Mobility Teams

Only the Supervisor/Team Leader need to have a mobile device to enter work times for individual members of a work team.

Uber-like job assignment

Jobs can be broadcasted to a group of field workers. The first one to take it will get the assignment.

GPS tracking

Users' GPS locations are recorded and sent back to office for displaying in a location map.

Hazards and Instructions

Capability to inform workers of potential hazards or communicate specific instructions relating to the work site.

Barcode Scanning

Allows user to initiate the appropriate datasheet template by simply scanning a barcode, or simply scan product barcodes for entry.

Signature Capture

Mandatory or optional capture of one or more signatures.

Audio notes

Eliminate the need to type notes where audio recording is more convenient.

Record Images & Sketches

Take pictures and annotate; draw sketches.

Messaging

Allows users to send SMS or emails to other employees.

Linked Documents & Files

Documents & Files linked to orders or companies can be accessed by the Freeway app and streamed down to the device.

Real Time Inquires

Real time back office inquiries, with the ability to capture a snapshot of a specific section, draw directly on the screen for highlighting, and then optionally record an audio clip to email for further action
